Norwegian NOx Fund as a driving force for LNG use

Geir Høibye
Special adviser
The Business Sectors NOx-fund
Norway

Viking Line Seminar
16. of January 2014
Environmental NOx Agreement 2008-2017

- Agreement between 15 Norwegian business organizations and the Ministry of the Environment
- Affiliated enterprises are entitled to exemption from the Norwegian fiscal NOx tax of 17,33 NOK/kg NOx
- They pay lower rates into the fund: Shipping pays 4 NOK/kg NOx
- 760 affiliated enterprises have joined so far
- The Fund has about **75 mill. €** each year available for support of NOx reducing measures (~ 50% to LNG-projects last 3 years)
- Administration cost of the NOx-fund is 2 to 3% of income
- Commitments: **reduce emissions by at least 34 000 tons/year**
- Total Norwegian NOx emissions in 2012 was 180 000 tons
NOx commitments and reductions

Tons

Commitments
Reduction (completed + applications)
NOx reduction from types of measures 2011-2017

- Selective catalytic reduction (SCR): 17%
- Exhaust gas recycling: 1%
- Engine modifications in ships: 6%
- Offshore use of gas: 5%
- Turbine modifications offshore: 9%
- Selective non-catalytic reductions (SNCR): 6%
- Process modifications Ferroalloys: 5%
- Energy efficiency measures: 14%
- LNG + batteries: 37%
- January 2014
Support to LNG projects (2011-2017)

- Support cover *additional costs* of investing in LNG fuelled ship
- Up to 80% of investment cost and up to **350 NOK/kg** NOx reduced so far. Support will decrease to **200 NOK/kg** from 1.7.2014
- Support also possible for LNG distribution infrastructure for applications in 2014
LNG propulsion of ships in norway

- In 2008 only 3 ships except ferries were running on LNG
- The NOx Fund has granted support to over 60 ships, converted to LNG or newbuilds. Applications for 30 more ships received before 31.12.2013
- In total Norway will have nearly 100 LNG ships in a few years time (incl. ferries on Government demand)
- LNG is used in various ship segments
  - Ferries
  - Cargo
  - Plattform Supply Vessels
  - Ro-pax
  - Tankers
  - Tugs
79 confirmed LNG fuelled ships world wide, of which 56 in Norway and 2 in Baltic Sea

Development of LNG fuelled fleet

Updated 24.07.2013
Excluding LNG carriers and inland waterway vessels
Development of LNG market in Norway

• In 2008 only 3 % of maritime fuel used in Norway was LNG
• By 2016 1/4 or up to \( \frac{1}{3} \) of maritime fuel used in Norway may be LNG

The NOx Fund works to improve the functioning of the LNG market in Norway together with our members

• From 10. of April 2014 the Norwegian LNG market is supposed to be regulated according to the EU gas directive: to open up to competition with Third Party Access to LNG infrastructure.
• Rules and regulation yet to be finished from the Norwegian Government
Norway: LNG-used 2004-2013, forecast to 2017

EU want more NOx-funds

• “…the Commission services will explore ways to encourage a bottom-up approach in encouraging the industry and public sector to set-up and manage a fund – similar to the Norwegian NOx Fund approach – by charging operators for emissions and then using the available funds for abatement technology, research etc”

"Pollutant emission reduction from maritime transport and the sustainable waterborne transport toolbox"
